Haikal Abizar

abizarhaikal@gmail.com 085775209504 Jakarta, Indonesia Haikal Abizar abizarhaikal

SUMMARY

Software Engineer | Frontend & Fullstack Development
Software Engineer experienced in developing enterprise web applications, operational dashboards, and backend services using React, Next.js, TypeScript, Node.js, and Python. Skilled in building RESTful APIs with Express.js and FastAPI, including computer vision-based image analysis services using OpenCV ORB.

EXPERIENCE

IT Staff - Software Development 01/2026 – Present
Perum Bulog Jakarta, Indonesia

- Developed enterprise web applications and operational dashboards using Next.js, React, TypeScript, Tailwind CSS, and HeroUI.
- Designed and implemented warehouse inbound workflows for the corporate Warehouse Management System (WMS).
- Built a Python FastAPI service using OpenCV and ORB for image feature extraction and matching, integrated into the Aktivasi Budaya web application.
- Collaborated with internal stakeholders to translate business requirements into functional, responsive application interfaces.

IT Intern 02/2025 – 12/2025
Perum Bulog Jakarta

- Developed backend services using Express.js, TypeScript, Prisma, and PostgreSQL.
- Built a Flutter-based mobile application and Next.js dashboards supporting internal business workflows.
- Developed and maintained corporate websites using WordPress, Elementor, PHP, and custom CSS/JavaScript.
- Collaborated with cross-functional teams to integrate web, mobile, and backend components.

Lead Laboratory Assistant 10/2024 – 11/2025
Gunadarma University Informatics Engineering Lab Depok, Indonesia

- Coordinated practicum schedules for 24+ laboratory assistants across 20 classes.
- Managed and migrated academic data for approximately 4,000 students using Google Colab and Google Sheets.
- Maintained internal websites, servers, and databases, including troubleshooting, backup, recovery, and deployment support.

EDUCATION

Bachelor of Computer Science 09/2021 – 08/2025
Gunadarma University Depok, Indonesia
GPA: 3.95/4.00

PROJECTS

Aktivasi Budaya - Image Fraud Detection Platform 03/2026 – Present
Perum Bulog

- Developed an internal web application integrated with a custom-built Python FastAPI service for image fraud detection.
- Designed and implemented image feature extraction and matching algorithms using OpenCV ORB (Oriented FAST and Rotated BRIEF).
- Built RESTful API endpoints to connect the image analysis service with the web application.
- Developed interactive application interfaces to support image analysis, monitoring, and reporting workflows.

Warehouse Management System (WMS) 01/2026 – Present
Perum Bulog

- Designed and developed responsive web-based dashboards using Next.js, TypeScript, Tailwind CSS, and HeroUI.
- Translated complex warehouse logistics, vehicle queue management, and inbound operational workflows into intuitive, user-friendly interfaces.
- Built interfaces to support warehouse operational monitoring and management across different user roles.

TRAILOO – Smart Trolley System 08/2025 – 11/2025
(PKM-KI 2025 Funded Project)
- Developed a responsive web and tablet dashboard using Next.js, Tailwind CSS, and shadcn/ui.
- Collaborated with backend and AI teams to integrate navigation updates and transaction monitoring APIs.
- Contributed to a nationally funded PKM-KI 2025 project featuring indoor navigation and tablet-based checkout.

PROFESSIONAL TRAINING & PROGRAMS

Fullstack Developer 02/2025 – 06/2025
Coding Camp powered by DBS Foundation
- Developed end-to-end web applications using React.js, Node.js, and Express.
- Designed and implemented RESTful APIs to support CRUD functionalities.
- Integrated applications with relational databases (PostgreSQL/MySQL) and non-relational databases (MongoDB).

Mobile Development 02/2024 – 08/2024
Bangkit Academy led by Google, Tokopedia, Gojek, & Traveloka
- Integrated machine learning models on Android using TensorFlow Lite, MediaPipe, MLKit, and FirebaseML.
- Served as a Student Representative and speaker, sharing knowledge and experiences during the Bangkit Academy Batch 2 program socialization.
- Integrated Google Maps API, enabling seamless navigation within the app and receiving recognition for improved user experience.

SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript, Tailwind CSS, HeroUI

Backend: Node.js, Express.js, Python, FastAPI, PHP, Laravel

Database & ORM: PostgreSQL, Prisma

Computer Vision: OpenCV, ORB

Tools: Git, GitHub, Figma, Postman

CERTIFICATES

- Belajar Pengembangan Aplikasi Android Intermediate
- Menjadi Android Developer Expert
- Dev Certification for Android (DCA)
- Belajar Pengembangan Web Intermediate
- BNSP Certified Programmer

AWARDS

Awardee of PKM – Karya Inovatif (TRAILOO Project) 2025
Funded by the Ministry of Education, Culture, Research, and Technology (Kemendikbudristek).
- *Developed "TRAILOO", a smart trolley system featuring indoor navigation and digital checkout via integrated tablet interface.*

Finalist - KOMPRES 2024 2024
Universitas Gunadarma
- Developed FreshFruit, an Android-based application powered by TensorFlow Lite for real-time fruit recognition and classification.
